WatchGuard® System Manager

2007

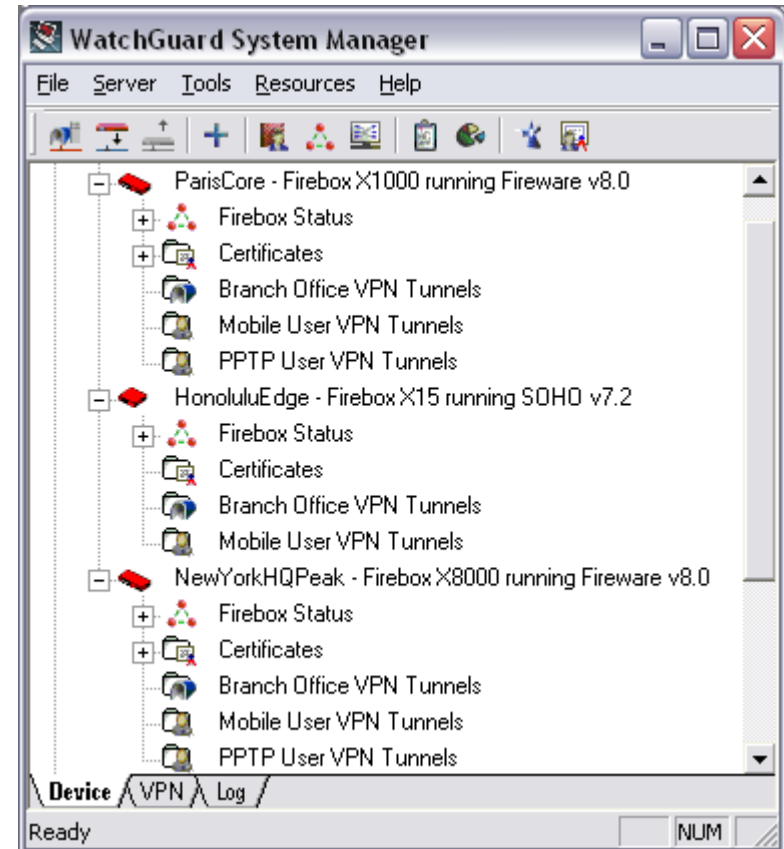

Stronger Security, Simply Done™

WATCHGUARD SYSTEM MANAGER 9.0

Management software for
Firebox® X appliances and
security options

**Simplifies network security
for the IT expert**

**Provides indispensable ease
of use for novices**

WATCHGUARD SYSTEM MANAGER 9.0

Intuitive graphical interface

- Easy to learn; easy to use

Unified management console

- No need to maintain separate software for multiple point solutions

Interactive real-time monitoring

- View, comprehend, and take corrective or preventive action – all in real time

Drag-and-drop VPN

- Fastest and easiest way to create secure branch office VPN tunnels

Secure, flexible logging and comprehensive reporting

- A rich suite of tools for expert analysis of security and network activity

OVERVIEW OF MANAGEMENT SUPPORT

WatchGuard System Manager (WSM) is the software used to manage Firebox® X security appliances and options such as Gateway AntiVirus/Intrusion Prevention Service and Web content filtering

WSM 9.0 delivers full management of:

- Firebox® X Peak™, Core™ and Edge™ e-Series
- Firebox® X Peak™
- Firebox® X Core™ with Fireware™ Pro
- Firebox® X Core™ with WatchGuard Firebox System 7.X
- Firebox® III

WSM 9.0 centrally manages VPNs among:

- All Firebox X Peak, Core, and Edge appliances
- All SOHO 6, SOHO, and S6 appliances
- Mobile users

UNIFIED CONSOLE PROVIDES EASE OF USE

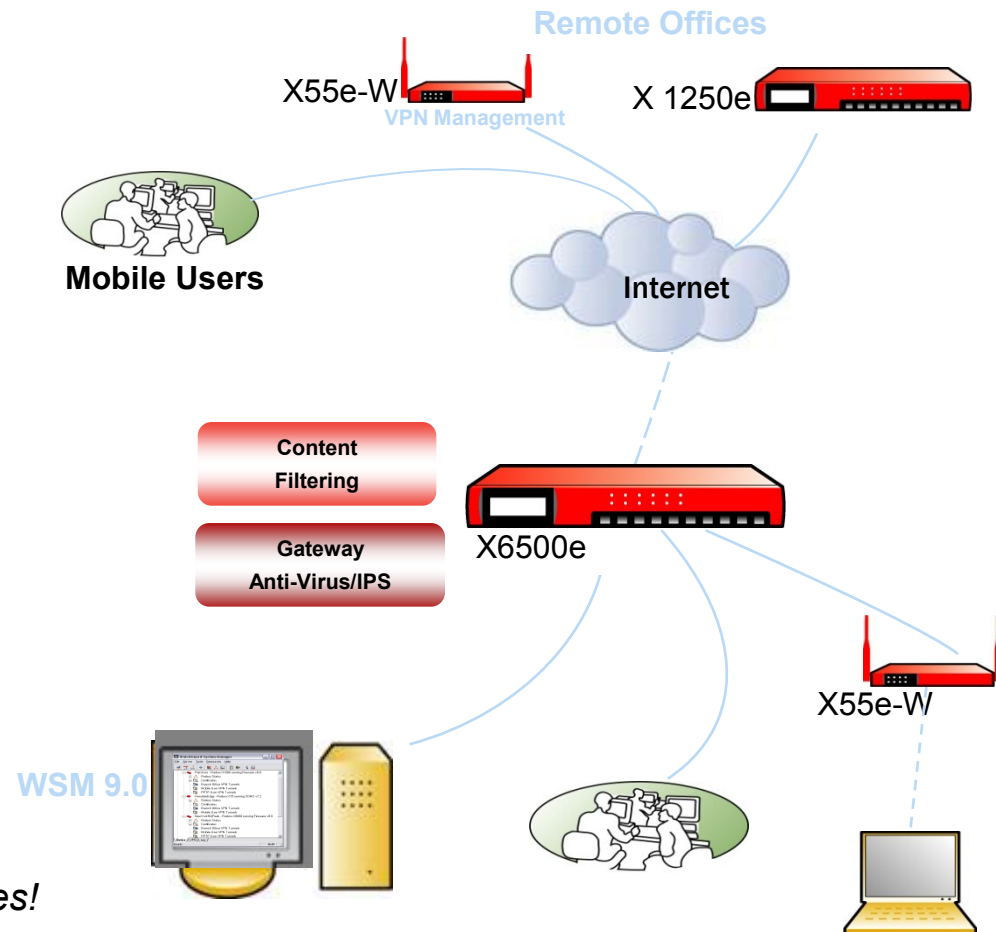

View all the appliances in your enterprise at a glance

✓ **Centrally manage all your e-Series appliances**

Launch monitoring or configuration tools for pinpoint control of any device or security option

Streamlined and efficient

✓ *New Fireware 9.0 advanced networking features!*

INTUITIVE GRAPHICAL INTERFACE

Smart look and feel throughout

- Smart, informative icons and graphical controls
- New default device view

Strong default security settings

- Network is secure from the start

“From-To” traffic paradigm for Fireware Pro

- Simplifies configuration in more complex networks

Granular, powerful controls for the expert user

- Custom-tailor configuration to meet changing business demands

ADMINISTRATIVE FLEXIBILITY

Choice of manual or auto-ordering of firewall rules

- Granular control of precedence for experts
- Can revert to auto-ordering at any time

Flexible use of objects

- Can use objects to streamline management
- No requirement to create objects – use only as needed

Offline configuration

- Save configuration changes instantly
- Option to craft configuration offline, saving as file until ready for deployment

HOSTWATCH™

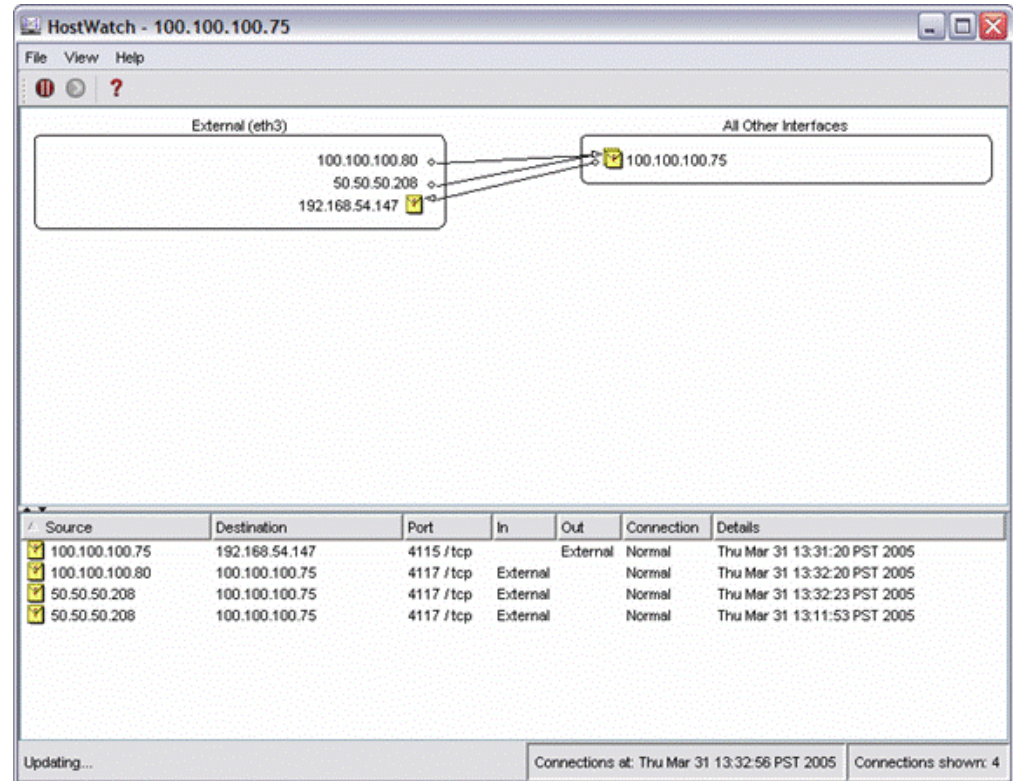

**Graphical display
of live connections**

**Watch network traffic
in real time**

**One-click access
to more details on
any connection**

**Prevent unauthorized
access by blocking sites
instantly***

**No major competitor offers
all of this!**

* Requires Firewall™ Pro, WatchGuard's advanced security and networking operating system

TRAFFIC MONITOR

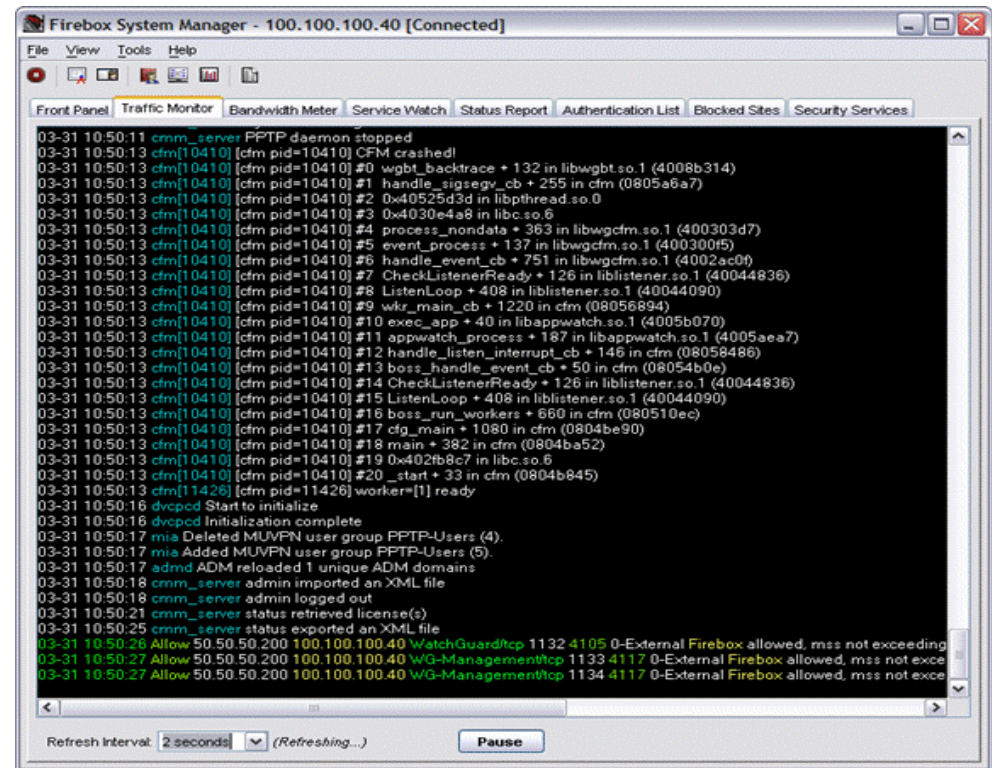

Scrolling display of Firebox logs

Displays Firebox logs in a scrolling, interactive interface

Eliminates the need to iteratively pull and view log files

Allows you to ping, traceroute, or block a site *instantly**

No competitor offers all of this!

* Requires Fireware™ Pro

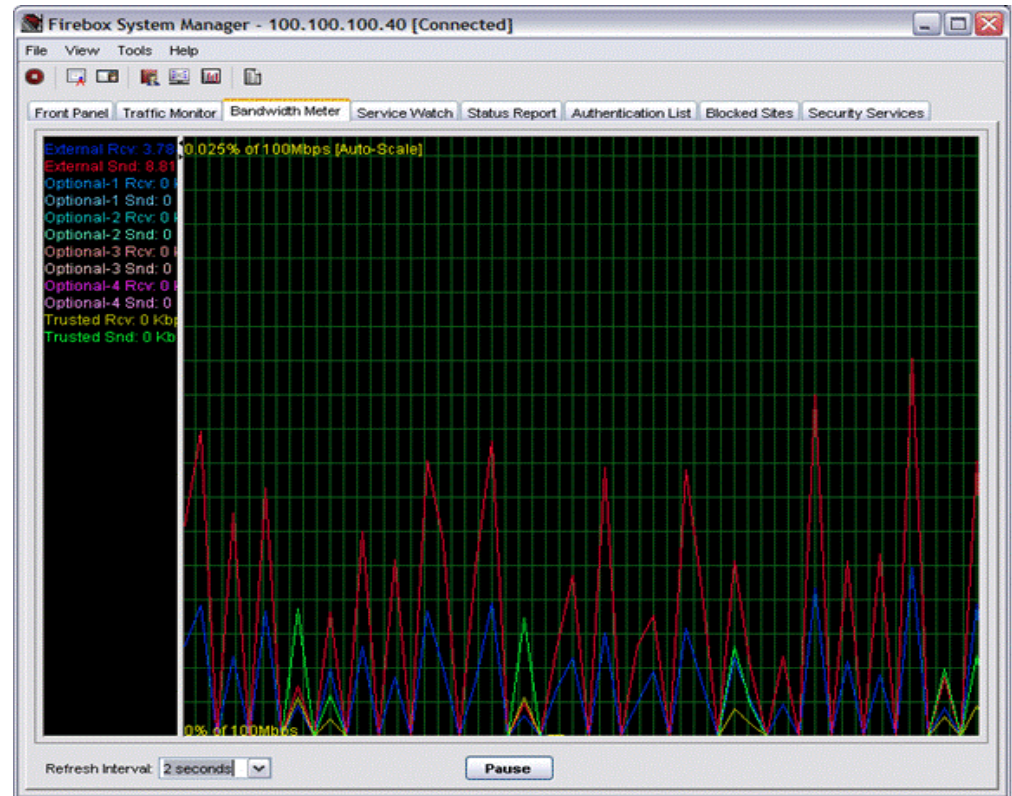

BANDWIDTH METER

Scrolling graphical display of bandwidth use

Manage your services –see how much of your available bandwidth is being used by a service or protocol at any time

Pinpoint bandwidth-consuming activities

Evaluate your external bandwidth usage and your QoS settings

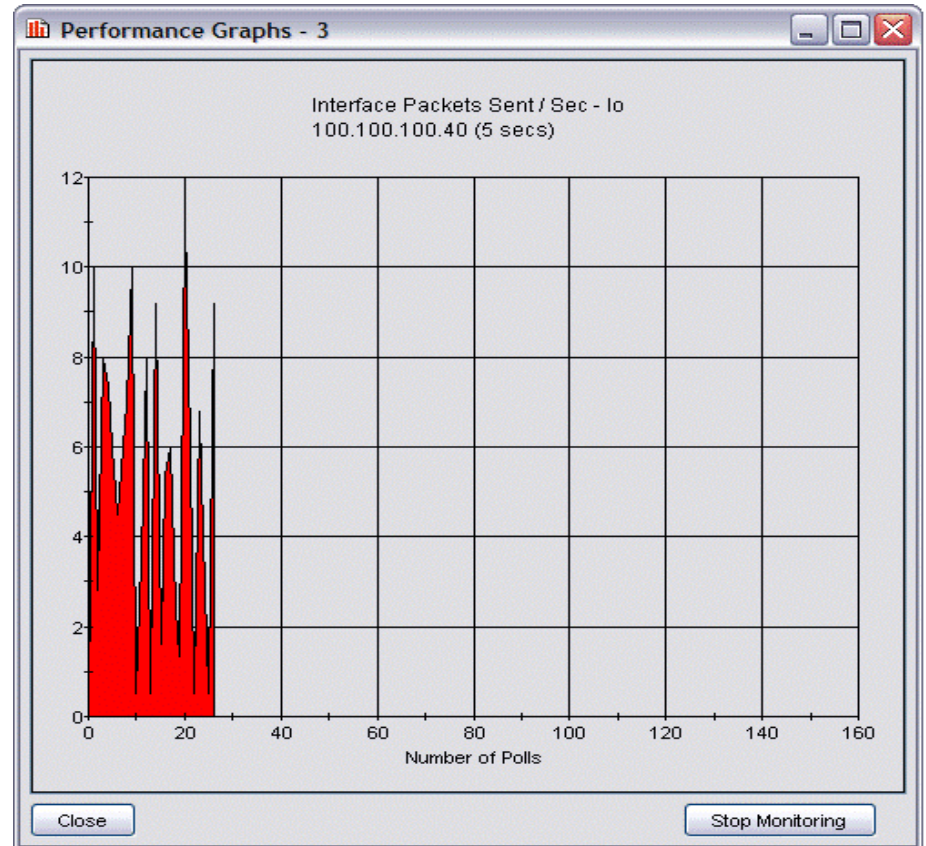

PERFORMANCE CONSOLE*

Graphical display of system performance

Monitor performance across dozens of system parameters

Gain valuable, real-time insight into how your Firebox is working

Validate policies through displays of policy-based statistics

* Requires Fireware™ Pro

DRAG-AND-DROP VPN MANAGEMENT

Fast, efficient, and virtually foolproof

Drag one device to another to create a secure branch office VPN tunnel

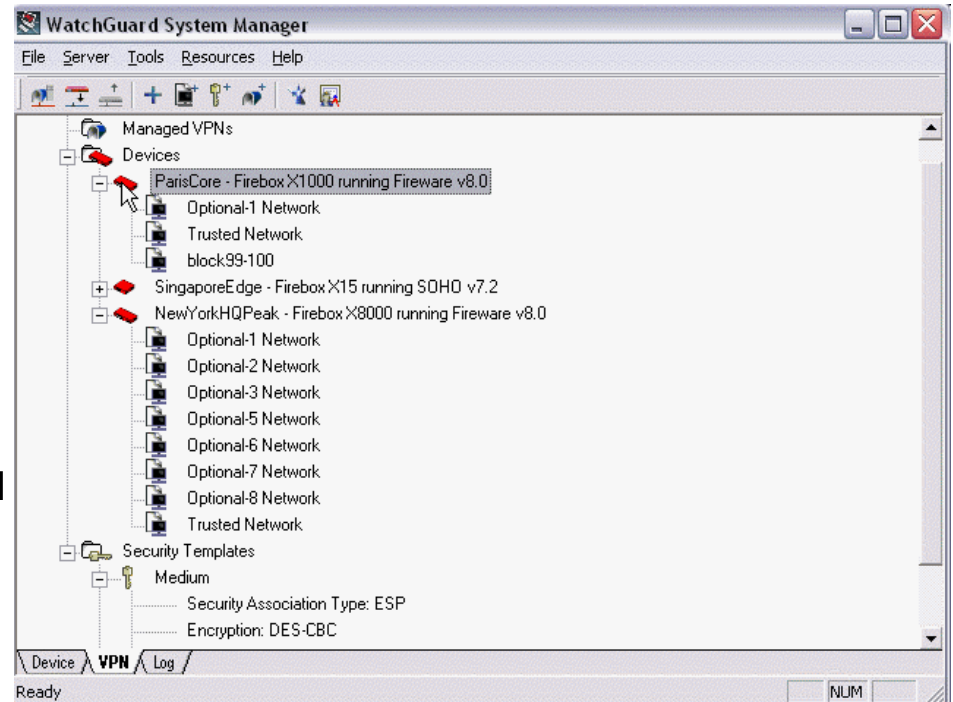

Support for multiple WatchGuard platforms

Simplicity lowers administrative costs

VPN configurations are distributed automatically

Support for High Availability and firewall rules

✓ New Fireware 9.0 advanced networking features!

COMPREHENSIVE LOGGING, NOTIFICATION, REPORTING

Powerful tools for expert analysis of security and network activity

Encrypted logging

- No need for dedicated IPsec tunnels for logging with XML or WSEP logs
- XML and WSEP log channels are TCP-based for reliable transmission

WatchGuard Log Server Failover

- If primary server fails or becomes unavailable, logs automatically fail over to another server (can specify multiple servers)

Logging is human-readable

- Plain-language log messages simplify troubleshooting, analysis

Comprehensive reporting options

- Use built-in Historical Reports – or third-party tools

SNMP support

- Flexible notification and monitoring options

COMPETITIVE ADVANTAGE

The power you need, all in one integrated platform

	WSM 9.0	SonicWall	Fortinet	Netscreen	Cisco
Interactive Real-Time Monitoring	Yes	No	No	No	No
Drag-and-Drop VPN Tunnel Creation	Yes	Limited	No	No	No
Centralized VPN Management	Included	\$\$	\$\$\$\$	\$\$	\$\$
Bundled Reporting Tools	Yes	\$\$	\$\$\$\$	\$\$	\$\$

AVAILABILITY, BUNDLING, LICENSE STRUCTURE

WSM 9.0

- Ships with Firebox X Peak, including a free 4-device WSM license
- Ships with Fireware Pro, independent of LiveSecurity® Service subscription
- Available free of charge to Firebox X Core or Firebox III customers with valid LiveSecurity Service subscriptions

WSM 9.0 supports existing VPN Manager licenses

- Can run a mixture of old and new licenses

New WSM device licenses are cumulative, not incremental

- Adds flexibility in purchasing and deployment of licenses

WATCHGUARD SYSTEM MANAGER 9.0

**Real-time, powerful,
intuitive, flexible
management controls
– at your fingertips.**
